Miners To Meet To Consider Sending Delegates

A Meeting in Calgary Called By President of Alberta Section of Canadian Labor Party—Organization Under U.M.W.A. Is Proposed.

Coleman Miners' Association will meet in the Community hall on Sunday at 2:30 p.m. for the purpose of deciding on the question of sending delegates to a convention to be held in Calgary on May 11, called by Fred J. White, president of Alberta branch of the Canadian Labor Federation.

This call has been sent to all organizations of miners in Alberta and southeastern British Columbia. It has been sent to organize all miners under the United Mine Workers of America which is affiliated with the American Federation of Labor.

Miners in the Crow's Nest Pass towns were formerly members of the U.M.W.A., but since they withdrew from that organization they were organized under the banner of the Mine Workers' Union of Canada, which was wrecked by Communist tactics. Local associations in various places, including Coleman, have been functioning since the split caused by the Communist party.

SALVATION ARMY SELF-DENIAL CAMPAIGN

The week of May 2 to 10 is appointed as the annual period of the world-wide Self-Denial campaign. Lieutenants Fitch and Pierce will be making collections through the Pass towns, and in addition to the amount set as their objective the Self-Denial fund, they are endeavoring to raise sufficient to pay the cost of adding a coat of stucco to the Army building in Coleman.

The public is urged to give as generously as possible towards this annual appeal. A house-to-house canvass will be made.

It is interesting to note that whereas Russia started out to reward workers according to needs, she is now back on the good old principle of reward in proportion to ability and effort.

Extensive Surface Improvements and Underground Development Indicate Continued Steady Output from Coleman Mines

EXTENSIVE development underground and improvements on surface property of International Coal & Coke Co. Ltd. indicate a long term of business in sight. Trackage of the haulage from the north mine to the tippie is being completely changed to eliminate time consuming switching of coal cars. This requires a new bridge across the Old Man River, which runs through the company's property, and a new grade which will swing in from north of the river and connect with the trackage from the south mine and thereby make a direct approach to the tippie without having to do considerable switching.

The old snow sheds covering the trackage from the tippie to the mines are being replaced by steel and corrugated iron structures. The new wash-house is now in use, though the old wash-house is still being used till the new house is completely fitted up with all requirements.

The improvements have run into a large sum, added to which is the big expenditure on the tunnel development work to tap new coal deposits.

FOOTBALL LEAGUE ORGANIZED FOR PASS TOWNS

Entry of Kimberley Delayed for Further Consideration by League Officials

The annual general meeting of the Crow's Nest Pass football league was held at Michel on Sunday. Representatives were present from Kimberley, Coal Creek, Fernie, and Coleman. Officers from last season were re-elected and Mr. Reilly of Fernie was elected vice-president.

After election of officers, Coleman's representative, James Hadley, asked that the meeting be postponed before the league table be drawn up, to permit of Kimberley's entry into the league to be fully dealt with by Alberta teams. Mr. Hadley's stand was that very small gates are derived from local games, and due to the heavy expense involved in travelling to Kimberley, he thought Kimberley's entrance into the league required consideration before a decision was given. Another meeting will be held at Michel next Sunday.

L.O.B.A. BAZAAR PRIZE WINNERS

Very successful is the report of the annual bazaar of the L.O.B.A. held last Saturday. The winners of the prize drawing were as follows: Cake won by Mrs. J. O. C. McDonald; luncheon cloth won by Mrs. Archer of Blairmore. There was a good attendance, and the members appreciate the support given them.

"He has the capacity to suffer keenly, to love greatly, and to care deeply for every fine thing in life—the measure of a man."—(Said of Gene Raymond by Arden Russell in Photography).

ALBERT KNOWLES DEPOSED SUBMARINE DESTROYING MINES

During the early stages of the German submarine campaign of the Great War, Albert E. Knowles of Coleman submitted to the Admiralty a plan whereby floating mines strung together and submerged a sufficient distance below the surface would on contact blow the submarines to pieces. He claims he never received any recognition for his device, though it was used by the Admiralty.

The Albertan in a recent issue gave quite a lengthy story of his plan, which was quite interesting.

PIGEON RETURNS AFTER TWO YEARS' ABSENCE

An instance of the remarkable homing instinct of a pigeon owned by Charles Makin, president of Coleman Homing Society, is shown in the following:

Two years ago, in a flight of the society's pigeons from Maple Creek, Sask., this particular bird did not return. On Easter Monday of this year, greatly to his surprise, this bird fluttered into Makin's loft. He examined it, and found the following note attached to its leg, fastened with a piece of cotton:

"From Shoop Bros., Montana. Came to me on March 25, 1936, and turned him loose on Easter morning. Would like to know if bird gets home."

Some men are failures working alone. When they join their talents and forces with another's they both often become successful. Possibly that accounts in part for the few outstanding bachelors in the world.

Social Creditors Hear E. O. Duke on Legislation

Monthly Dividends Will Come When Financial Credit of Province is Re-Established, States Rocky Mountain Member.

A fair crowd of electors met in the crowded church club room on Wednesday evening to hear their Social Credit representative, E. O. Duke, give an account of the Social Credit administration as passed at the last session of the legislature. Mr. Taylor, representative of the Pincher Creek constituency also spoke. Rev. A. S. Partington was chairman.

Mr. Duke gave a word picture of the scene that prevailed at the opening of the world's first Social Credit government; the packed galleries, the scene on the floor of the house, the Press representing papers for the entire North American continent and the air of expectancy that hung over the scene. Mr. Duke stated that some Social Credit promises had been implemented. He dealt with hospitalization and the Teachers' Profession Act, Of the Bond Refunding Act, he stated that the government could pay three per cent, but it

(Continued on Page 4)

Wanton Damage To Property

WANTON destruction of fences and guard rails on the hill leading up from Nez Perce Creek and at the hill near the Anglican church should be investigated and the culprits made to pay for same.

TENNIS CLUB ORGANIZES

Coleman Tennis club held its annual meeting in the council chamber on Sunday to organize for the season. The slate of officers for the 1935 season were unanimously re-elected to serve another term. Mrs. Luke Lindoe as president and F. G. Creegan as secretary. The courts will be put in shape just as soon as weather permits and with the same low fees as last year, a large number of enthusiasts are expected to be seen on the courts in the near future.

NOTICE RE TENNIS CLUB

Persons desirous of becoming members of Coleman Tennis club are asked to approach F. G. Creegan, secretary, for particulars. Season's fees are: Adults, \$5; Married Couple, \$9; Juniors, \$2.

If you don't think in your innermost thought that you can master a given situation, how do you expect to convince others? First "sell yourself" on the idea that you are just the man for the job.

Mis-Spelt Word Competition Interests Young Folks

Olive Brown Is Winner in Last Week's Contest. Watch For Next Week's Mis-Spelt Word.

Those sending in the correct finding in the mis-spelt word competition in last week's advertisements were as follows:

Joyce Williams, Olive A. Brown, W. Michalsky, O. Salvador, Ernest Houghton, Jr., Daisy Lochrie. Another was received with the correct answer, but no signature was attached. The correct word was "Spaghetti." It appeared in the advertisement of Coleman Cash Grocery.

Mrs. S. Krayzy discovered a typographical error in Ledieu's advertisement, and George Houghton also discovered another error in Coleman Cash Grocery advertisement, the word Governor being mis-spelt Governor. This was not an intentional error, but one that slipped past the proof-reader, having been spelt wrong in the original copy supplied.

Another mis-spelt word will be found in next week's display advertisements. Watch for it, for you may win a handsome fruit bowl.

All correct answers are placed in a box and the first drawn is awarded the prize.

Journal ads. have pulling power.

Once you have tasted Christie's SULTANAS

you'll appreciate why nearly everybody likes their fresh fruit flavor so much. They are packed full of plump, uncrushed Sultanas and baked to a delicious, delicate crispness. That's why they're so extra good.

Christie's Biscuits

"There's a Christie Biscuit for every taste"

WORLD HAPPENINGS BRIEFLY TOLD

Unqualified approval of Turkey's request for permission to fortify the Dardanelles was expressed in the official Soviet organ, Izvestia.

Unconfirmed reports at Halifax said the Canadian National steamships Prince Henry and Prince David may be brought back into service for cruises out of New York.

In the Empire Day program May 24, the Nizam of Hyderabad, believed richest man in India, will talk for the British Broadcasting Corporation.

The British destroyer Scout transported the body of Dr. Leopold von Hoesch, late German ambassador to Britain, from Dover to Wilhelmshaven.

An increase of 13 per cent, was recorded in the total production of Soviet industry during the first three months of 1936 compared with the same period last year.

The Mellon Institute of Industrial Research reported advances in the fight against pneumonia and development of a new type of tuberculin that may aid in diagnosis of tuberculosis.

Deciding it's a bother to unload freight cars at a station, German railroads have experimented in loading the entire car on a motor truck and delivering the whole cargo on the hoof, or wheel.

F. Napier Denison, director of the Dominion meteorological observatory at Gonzales Heights, has retired, completing more than 37 years in the government meteorological department.

The king has consented to become patron of the National Rifle Association, and the Duke of Gloucester is continuing the donation of £250 for the king's prize.

Convoyed By Destroyers

Art Treasures Loaned To Britain Sent Back To China

Priceless Chinese art treasures recently on exhibition in London, were conveyed by British destroyers, almost like a troopship in wartime, back to China.

The several thousand pieces of art, some of which dates back far before the time of Christ, form the bulk of the Chinese art exhibit held recently at Burlington House. Many other pieces were lent by the royal family and by private collectors.

Years of negotiations were necessary to induce the Chinese government and people to part temporarily with the collection, which was sent to England aboard H.M.S. Suffolk.

Newest Medical Service

A parachute medical service has been organized by a group of surgeons and physicians graduated from the Soviet government parachute school. The doctors will answer urgent calls by plane, descending in parachutes where landing fields are not available. The service has headquarters at the Moscow civil airfield.

The origin of Cambridge University in England is obscure. It probably grew out of a local educational movement during the twelfth century.

Jack Miner's Birthday

Famed Naturalist At 71, Counts His Wealth In Friends

Jack Miner celebrated his 71st birthday April 10th. Edgar A. Guest, the Detroit poet, terms him "the best beloved Christian in America"; while Irvin S. Cobb, writer and humorist, says "Jack Miner is the greatest practical naturalist on the planet." An editorial in the "Ottawa Citizen" says: "Not Watt, but a succession of inventors made the electric engine; not Bell, but many electrical experimenters made the telephone. Jack Miner, in this sense, has given us the bird sanctuary." In other words, popularized the sanctuary idea.

While his hair is turning somewhat white, otherwise no one can notice the years creeping on him, because he is as active and as enthusiastic in his study of bird life as he was twenty years ago.

JACK MINER, NATURALIST

The world knows he is poor financially, and he says: "My biggest asset is my friends throughout the world, and the good health the good Lord has blessed me with. The friends are something money cannot buy. Some men can count their money, but I can't count my friends."

In his birthday interview, he said: "If it were not for children, flowers, birds and music—especially children—I would have no desire to carry on." And his advice to young men was: "Don't work all your life to make a living, but work to live all your life."

When asked what he thought about world affairs, he said: "The hope of the world is more love and the right kind of education, and less beyond-point compulsion."

Speaking of religion, he said: "There is too much 'churchianity' and not enough Christianity, and the world needs more evangelism and less 'apologetics'."

Everybody knows he never uses tobacco in any form, and never drinks anything stronger than water; but he said to-day, "You cannot judge the size and quality of any man's heart by the smell of his breath."

In closing the interview, he said: "If a man is built of the right material, the more you sit on him the broader it will make him."

"Be sure you're right and then go ahead, because you will be criticized if you do, and you will be criticized if you don't; so, do and be criticized; but to escape criticism, say nothing, do nothing and be nothing."

According to a theory of two English scientists, magnetic storms that interfere with telegraph and cable service are due to a ring of electric current that surrounds the earth like Saturn's rings.

An explorer reports that he has discovered a bean in Southern Asia that grows at an astounding rate. The usual procedure is to place the bean in the ground and then jump clear.

MILLION DOLLAR WRIGLEY SIGN STARTS OPERATION

The new Wrigley Spearmint Gum Sign on Times Square, New York City, a million dollar project, largest of its kind in the world, was formally dedicated and put into operation on Saturday evening, March 28th.

The sign occupies the entire block on Broadway from 44th to 46th Street on the east side of Times Square. The new sign is a super-structure on the top of a two-story steel and concrete building built especially to bear the tremendous weight of the display. This world's largest spectacular towers ten stories high; the Spearman on the sign has a grin a yard wide. In the package of Wrigley's Spearmint is larger than a boxcar.

The sign shows gigantic, multi-coloured, tropical fish swimming about the sky; the largest fish measures 42 feet from tip to tail. The flashing mechanism consists of 21 pieces of apparatus, all operating in unison, but no one piece is synchronized with another. The electrical current required for this huge display would serve a city of ten thousand. There are 1,084 feet of neon tubing and almost seventy miles of wire used. The investment on the entire project is a cool million dollars.

Hundreds of thousands of people will pass the sign each day; the number who pass daily through the subway at Times Square is estimated to be almost equal to the population of Toronto.

Have Every Freedom

Spanish Women Not Cloistered As In Old Days

The long-sheltered women of Spain have been coming from behind the romantic iron grills that used to shut them off from the world to invade fields once closed to them.

While 25 years ago the number of women in Spanish universities could be counted on the fingers of the hands, to-day in some of the faculties, such as philosophy and literature in the University of Madrid, there are more women than men.

The republic overnight gave Spanish women the vote and in Madrid more women voters are registered than men. Where a woman distinguished in some branch of learning used to be a rarity, to-day there are scores of women whose names are known throughout Spain.

Years ago most Spanish girls could not go out unattended until an advanced age. Those in moderate circumstances went with their mothers or married sisters. Those in wealthy families were attended by dunnas who never left them alone in public for a moment. To-day girls, alone or accompanied by companions of their own age, are seen in public just as in other parts of the world.

Life is just a merry-go-round. We have to work to get a loan and then work twice as hard to get rid of it.

Part of South Africa's government mint in Pretoria may be converted into an ammunition factory.

Dividing Of Territory

Nations With Vast Expenses And Those Who Have Not

Nations of the world could be divided into two classes—the "haves" and the "have nots"—Major-General W. A. Griesbach, of Edmonton, told the United Services Institute of Nova Scotia at its annual meeting in Halifax.

One class, including Great Britain, Russia and France, had vast expenses of productive territory, while the other, including Germany, Japan and Italy, had no room for expanding population.

Sooner or later the British Empire, with its tremendous resources, would be challenged, Senator Griesbach said.

"This may mean war and tribulation for us, but history tells us that that is the age long test by which the nations are judged in their struggles to survive, to be happy, to be free, to be secure."

Find Ancient Tomb

Huge Underground Vault Is Discovered In China

Obscure points in China's history are expected to be cleared up as a result of the finding of a huge, unknown tomb near Haichow, in the northern section of the province.

The tomb dates from about the year 800 A.D. and is made up of so many huge vaulted underground chambers that it is described as "big enough for a house for the living rather than one for the dead."

YOUR GARDEN

In the fairly large garden there is a special place for fruit. This end of the business is often neglected especially in those not infrequent sections of Canada where the winter is severe and the summer season short. But there is some fruit which may be grown almost up to the Arctic Circle. Under garden conditions where it is possible to furnish more than the usual protection, most things can be grown far north of their ordinary environment. Certain types, it is true, may succumb in a winter such as was experienced in 1933-34, but the trees are not expensive and are easily replaced. Strawberries, gooseberries, currants, Saskatoon berries and cherries are all hardy. In garden fruits the beginner is advised to include more of those things which will produce fresh desserts and salads early in the season when it is difficult or expensive to get imported supplies. In this connection early cherries like the Richmond, early apples such as Yellow Transparent, St. Lawrence and Red Astrachan, or some of the new varieties developed by the Experimental Farm authorities, are worth considering. Where space is very limited it is quite feasible to grow grafting or budding, to have several varieties of apples on a single tree. This applies to apples and pears especially in particularly effective.

In recent years there has been a good deal of interest in rock gardens which is a very natural development when it is realized that artistic results can be secured. Where the ground slopes sharply this sort of treatment is particularly effective.

Large irregular boulders are sunk well into the ground and the little alpine plants are grown in deep earth pockets between. Most of these plants originated in the rocky slopes of the old lands and in our mountainous sections in rock gardens they change an ugly or washed-out bank into a most attractive feature.

Plants for a garden with a profusion of bloom. In special sections of the seed catalogue with the height and colour of each plant that there will be no difficulty in making a selection. About 46 different types of all colours and sizes are available from the Dianthus, Forget-Me-Not, Violas, Primulas which grow up to eight inches in height, through the medium sized Alyssum, Arabis, Campanula, Linnaria, to the taller Erigeron, Cerastium, Candytuft, Geum and Pyrethrum and others.

Climbers play an important part in any scheme of landscape gardening, adding a finishing touch to walls, fence or verandah that is not possible by any other means. There is a mistaken idea that such plants may be harmful to brick or stone work, but there are many old buildings in the old lands which have been supported by vines for centuries and the walls under these green mantles are said to be in an excellent state of preservation.

Another fact that climbers add to the fact that climbers add a little trouble to the job of painting the woodwork around doors and windows, authorities claim that there are no harmful effects whatever.

Peace Conference

Latin-American Government Would Form League Of American Nations

Proposals from three Latin-American governments that a league of American nations be formed to preserve peace in the western hemisphere were made public by the state department at Washington.

They were among the specific suggestions sent to President Roosevelt by the heads of 17 South and Central American states in their formal acceptance of the United States government's invitation to the forthcoming inter-American peace conference.

Proposal From Japan

Naval Commander Suggests Dividing Power In The Pacific

A proposal that power in the Pacific be divided among Great Britain, the United States and Japan was voiced in a book by Commander Tota Ishimaru of the Japanese navy. "Let each of the three reign supreme in its own domain," Commander Ishimaru says in his book, just published, "America in the east, Japan in the western, England in the southern Pacific."

Now Science Explains Why So Many People Past 40

Feel That They're Slipping Losing Their "Grip" on Things.

Many people "round 40" think they're "growing old." They feel tired a lot, "weak." Have headaches, dizziness, stomach upsets.

Well, scientists say the cause of all this, in a great many cases, is simply an acid condition of the stomach. Nothing more.

All you have to do is to neutralize the excess stomach acidity.

When you have one of these acid stomach upsets, take by the "Milk of Magnesia Tablets," Made in Canada.

Try this. Soon you'll feel like another person! Take either the familiar liquid "PHILLIPS" or the convenient new "PHILLIPS" Milk of Magnesia Tablets.

Also in TABLET FORM: Phillips' Milk of Magnesia Tablets are now on sale, taking drug stores everywhere. Each unit tablet is the equivalent of a teaspoonful of the liquid "PHILLIPS" Milk of Magnesia.

PHILLIPS' Milk of Magnesia

Matched Crochet for Matchless Chic

Household Arts by Alice Brooks

A Beginner Can Crochet These

PATTERN 5559

Have you seen a smarter pair of matching accessories this Spring? And wouldn't they give your new ensemble that finishing touch you crave? The jaunty, dip-brim hat is quickly crocheted in gumpe, its brim in rib stitch, with the same stitch repeated in the purse flap. A braided cord trims both hat and purse.

In pattern 5559 you will find complete instructions for making the set shown, an illustration of it, and of all the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

NOTES AND COMMENTS

EAGER GARDENERS are delayed in their planting by a fall of snow which disappeared the day after as quickly almost as the proverbial snowball in Hades. Every year a steady improvement in gardens and household surroundings is seen, and thrifty householders who try to improve the little corner in which they live bring added comfort to themselves and set a good example to their neighbors. Individual effort towards improvement makes the town a better place in the long run.

THE provincial government denies to newspapers the carrying of beer and liquor advertising, but takes over the entire distribution of all intoxicating beverages, and the profits therefrom. From Coleman alone a revenue of at least \$20,000 net is derived, not a cent of which is returned towards local revenues. If it is morally wrong to advertise liquor and beer, it is equally morally wrong to be a partner in the traffic, yet the present provincial government is deeper into it than any previous government has been. Many righteous reasons are advanced by the premier why this should be. Might is right. He has decided to hog the entire profits, and other publications coming from outside the province into it will get the advertising that formerly was apportioned among Alberta newspapers. Just another of those peculiar quirks of our one-man government of the Major Douglas type, who, in a letter to Premier Aberhart, urged that all who oppose Social Credit should be "pilloried" through the radio and the press.

A provincial bank will not solve Alberta's financial problems, though it might be made to appear this is a step towards implementing the pre-election promises of Social Credit candidates. It is just another of the dream-like proposals on a par with the proposed automobile highway to connect Alberta with Asia via the Behring Straits. Wonder what the next Barnum-like fooling of the people will be? The government should organize an up-to-date circus with members running the sideshows, thereby possibly developing more tourist traffic.

PERIODICALLY a number of dogs are poisoned, five succumbing last Saturday. Just why or how this happens has never been discovered. It has been suggested that it may happen through dogs digging into decomposed garbage which has lain frozen during the winter, and is unearthed in the spring thaw. But the cause has never been discovered, except that some of the dogs, owners claim, show every indication of strychnine poisoning. If this poison is left out intentionally, then it is a dastardly trick. If it is accidentally or negligently thrown out, it is quite as damaging and renders those so doing guilty of criminal negligence.

BUSSES have to fall back on the railroads to help them. Passengers on busses between Calgary and Edmonton were transferred from busses to trains to continue their journey into Edmonton. Recently in Eastern Canada railroads were the only means of transport whereby supplies could be taken to several towns. It shows that the country would be in a bad fix during emergencies were it not for the railroads, and people should remember this in considering the important part railroads play in the life of the country.

THOSE WHO work for a higher standard in community life become the targets for criticism and abuse of those who have no desire to get out of the rut in which they travel. The more people there are who engage in the activities of local organizations which have as their aim the promoting of the welfare of the people, the higher type of citizenship surely results. Individually we rise only by the effort we make and the exercise of will power. The only power that can save you from retrogression is within yourself. Self-discipline and mental courage are essential.

THE JOURNAL indulges in a brightening up by a colorful display on the front page, in order to stimulate our own thoughts, and of those who read the paper. Even at the risk of being accused of boasting, we are proud of the part we are privileged to take in community life, even though it brings brickbats and criticism. But the occasional word of appreciation is a bright spot that filters in at times. The Journal has always used its efforts on the side of progress and improvement in local conditions, and at times has expressed its impatience with the inertia on the part of some which is a drag on the efforts of the more progressive element of the community.

THE POINT IS, our main concern is to build Coleman. If we can stimulate others to become enthused with the same ideal, then our efforts will be considered worth while. The local weekly newspaper is the mouthpiece of the community, it reflects its joys and its sorrows, and occupies an important part in the activities of every worth-while community.

Amateur night promises to be
a great success. It is being orga-
nized by the local Elks lodge, to
take place on Friday, May 1.
The entries, limited to 40, are
already in the hands of Secre-
tary Rushton.

Dogs belonging to the follow-
ing were poisoned on Saturday:
W. Smith, Fred Brown, Arthur
Jones, W. Williams, J. Lonsbury
and J. Bell. The latter was dis-
covered in time to be given an
emetic and thereby his life was
saved.

McGillivray Coal Co. recently
installed a new steam whistle,
which has a rather musical
sound compared with the one
formerly in use. It sounds like
a steamship siren, and reminds
one of around the docks when
it blows its daily signals.

At a special meeting of the
executive of the musical festival
committee on Monday, a Mr.
Bevan of Moose Jaw was ap-
pointed as adjudicator in place
of Mr. Geary, who has accepted
a higher position in eastern Can-
ada in one of the important
churches.

Ralph Rippon, 14 years, has
made a very fine self-driven
model of a stream-lined train,
similar to those in use on
United States railroads. It has
three units, with an electric
headlight and electric lights in
the coaches. Another interest-
ing model made by him is a full
rigged sailing ship.

PRACTICAL PARAGRAPHS

by John Edwin Price

SENTENCE STIMULANTS

If you are in charge of other men, never imagine for a moment that softness will win their long-time respect or regard. A superior can be firm with kindness and strict with justice.

FRIENDSHIP CONSERVATION

We have heard about soil conservation and forest conservation, conservation of this and conservation of that.

There is one thing that most small town people have learned that people in larger centres sometimes ignore. That is, the conservation of friendships.

It is folly to throw away friendships anywhere in a world where real friendships are so rare.

Two people more often become estranged because of misunderstanding than because of definite injuries. Also sometimes silence is misunderstood. The person remaining silent may not feel bitter but the other interprets the silence as indicating hard feeling.

In a close knit community or a small town, a friendship involves more than two persons. When real friends become estranged, organizations in which they formerly pulled together suffer—and the community as a whole misses their team-work.

"G. R. A." gave the world a golden nugget of wisdom in the Birmingham (Mich.) Eccentric for April 2nd. He said:

"Much of the misunderstandings between people arise over trivialities. Recently I observed two men straighten out a very slight disjointed relationship that might have developed into a lasting resentment. These men got together within eighteen hours of the triviality—nipped the weed in friendship's garden."

COPYING FROM ARTICLE COSTS BOY ESSAY PRIZE

NEW YORK, April 14 (AP)—A Missouri farm boy was awarded and then lost Eddie Cantor's \$5,000 peace essay contest when it was found he had copied from an article by Dr. Frank Kingdom, president of Newark University, New Jersey.

Lloyd Lewis, whose entry was picked by four college presidents as the best of 212,000 essays, said he didn't understand about plagiarism. He looked up a lot of magazine articles on peace in the library and then picked out what he thought was best. The award carried a college education. The boy, who lives near Plattsburg, Mo., had never been more than 50 miles from home until he was brought to New York a few days ago.

Social Creditors

(Continued from Page 1)

was an impossibility to pay five per cent or more. Mr. Duke gave definite assurance to his audience that as soon as the credit of the province was fully established, every bonafide citizen of Alberta over 21 years would be given a Social Credit dividend of \$25. In his closing remarks Mr. Duke pleaded for the solid support of the electorate for Social Credit.

Mr. Taylor spoke in humorous vein on his personal experiences in the Legislature, giving intimate sidelights on several members of the government. He stated he was 1000 per cent more convinced now on the feasibility of Social Credit than he was a few months ago. He scored the ridicule and criticism of non-Social Creditors and stated that the government was more determined than ever in the face of such to bring Social Credit to a successful conclusion.

Questions asked were in connection with the Workmen's Compensation Board and Unemployment in the province which were answered by the member.

LOCAL NEWS

GOLF CLUB NOTES

The annual meeting of the Crow's Nest Pass golf club elected the following Coleman members to the executive: G. Pattinson, secretary; W. L. Rippon, treasurer, and R. F. Barnes. The club looks forward to a good season.

There is talk of the golf course east of Coleman being put into shape, after being in disuse for several years. The land on which it is located is owned by J. Michalsky.

SCHOOL BOARD

RENEWS LEASE

The school board has renewed the lease on the Knights of Pythias hall for another year. There is talk of erecting a school building to take the place of the four single room buildings now in use. The staff at present consists of four in the high school and 14 in the public schools, and total attendance over 600. The board decided against purchasing trees and shrubs for the school grounds, as previous trials at Cameron school showed that the effort was wasted through destruction and neglect.

No negotiations have been entered into for the purchase of additional property for school purposes, it is reported.

Notice of By-Law

NOTICE IS HEREBY GIVEN that the Council of the Town of Coleman intends to pass a By-Law for the purpose of closing and selling that portion of the Lane in Block 9, Plan Coleman 820 L, abutting on Lots 25 to 30, both inclusive.

Dated this 16th day of April, 1936.

Vancouver's Golden Jubilee

Fifty years ago the first trans-continental Canadian Pacific Railway train from Montreal reached the Pacific Coast. This summer Vancouver, now the Gateway to the Orient and port for ships of the entire world, will celebrate the Golden Jubilee of its founding as the western terminal of the Canadian Pacific Railway. Commencing July 1 with Dominion and International Good Will Week, the programme concludes with the Canada Pacific Exhibition on September 7, and includes land and water sports, several weeks of grand pageantry, musical attractions, visit of American warships, a two-day air show with a solo flight across Canada planned as the highlight, floral decorations, visit of 15,000 Shriners in mid-July, traditional

pageantry of an Alderhot tattoo, frontier week, street dancing and costume balls, and historical exhibits arranged to illustrate Vancouver's steady progress during the first half century of its existence.

Even before the beginning of the celebration proper, many colorful events will be given recognition, including Empire Day and horticulture show in May; Pioneers' festival on June 15-14; schools' programme in June; Eucharistic Congress, which will attract thousands, June 11 to 14; golf tournament, King's birthday, and religious dedicatory services.

One of the highlights of Vancouver's celebration will be the re-massing of the arrival of the first Canadian Pacific train

almost half a century ago. The venerable old engine, first to the coast, will be run again, with its original pilot, W. H. Evans, at the throttle. Some of the old-timers who saw the first train arrive will also be present for the ceremony. The Canadian Pacific Railway will run tours at low cost from Eastern Canada to the Pacific Coast for the event, with stop-over privileges at Banff Springs Hotel, Chateau Lake Louise, and other famous Rocky Mountain resorts.

Pictures show the old and the new Vancouver, and Sir William Van Horne, second president of the Canadian Pacific Railway, who chose the name of Vancouver in 1854 for the western terminal of the first trans-continental railway line.

YOU can cut Dixie coarse or flakey just as you like it. It's economical, too, for you cut it only as you use it—there's no waste.

DIXIE PLUG SMOKING TOBACCO

The Queen Mary

Disappointment is probably in store for millions in the British Empire who have conceived the impression that the first trip of the Cunard-White Star's super-liner, the Queen Mary, scheduled for May 27, is a world-sporting event of the first magnitude with the blue ribbon of the Atlantic for speed as the stakes.

The speed record for the Atlantic was held for the British for 22 years by the Cunard Steamship Company's Mauretania until August, 1929, when the title passed to the Rex, flying the flag of Italy, and has not since been recovered by any vessel carrying the Union Jack.

Millions have been led to believe that the Queen Mary is expected to win back the speed supremacy of the North Atlantic for Great Britain and as a result of the great amount of publicity given to this vessel during the course of her construction and on the occasion of her launching at Clydebank a few weeks ago they confidently anticipate that this consummation is to be achieved by the new boat, but this according to the London Times is not the purpose of the construction of this great steamship.

On the contrary, the Times shatters this and other misconceptions of the purpose and mission of the Queen Mary. Not only was she not built to wrest the speed supremacy of the North Atlantic from another country but, we are told, she was not designed to be the most luxurious liner afloat, despite reams of descriptive material which has been published emphasizing the lavish nature of her appointments and equipment.

"The problem," says the Times, "was not to build a ship so big and so fast as to 'stagger creation'. The problem all along was to build 'the smallest and slowest ship that could form one half of a weekly service'."

Continuing the Times says: "Speed is very expensive; and a ship must be big to pay for it. On the other hand size is also expensive; and there is need for nice calculation. The Queen Mary is not meant to be the biggest and fastest ship afloat. She is not meant to be a 'luxury' ship at all. It has been made perfectly clear that the luxury will be there for those who seek it; but one advantage of great size in a ship is that room can be made for all sorts of people, and the Queen Mary is not for the rich only."

However, if the Queen Mary is not designed to be the largest ship afloat or the fastest boat on the seven seas or even the most luxurious, she has claims to distinction which make her an impressive monument to the brains responsible for her creation, exemplified in the words stability, strength and safety and these attributes have been achieved without undue sacrifice of size, speed and lavishness.

On the contrary, the Queen Mary is of noble proportions and embodies the last word in naval architecture, marine engineering and scientific research.

Every conceivable device has been adopted to justify the claim made for the Queen Mary that she is the safest ship afloat and that passengers aboard her will be safer than in their own homes. To quote a recent issue of Pearson's Weekly she is "so well equipped with scientific instruments that it will be literally possible, with a little adjustment, to send her from Southampton to New York without a man aboard," and, "she will be able to steam through impenetrable fog at 40 miles per hour, automatically steered and protected from collision with ships and objects."

These devices include a "radio searchlight" with which the Normandie is also fitted, a continuous beam of ultra-short radio waves which sweep the horizon ahead of the bows of the advancing vessel and record obstructions on a sensitive receiver.

Another is the infra-red ray detector to locate other vessels or icebergs at a great distance in dense fog or black night. "The latest detector of this kind," says the writer in Pearson's Weekly, "is so sensitive to changes in heat waves that it can detect a man through a mile of heavy fog by the heat of his body."

The boat is equipped with an automatic helmsman, consisting of a gyro, electrically connected with the steering gear in such fashion that if the vessel defects on a half degree from the set course it will automatically be swung back on the true course. An "echo sounder" will guard the vessel against striking a submerged wreck or iceberg growlers, which hardly show above the surface.

The Queen Mary is practically fireproof. Each cabin is safeguarded by a thermostatic alarm which automatically sets water sprinklers in action when the temperature rises above a certain level and the "electric eye" will be used to detect fire in the holds. At the slightest trace of smoke the electric eye will sound the alarm and release a stream of carbon dioxide gas, automatically selecting the burning hold and smothering the blaze.

No wonder Purity Flour is a favorite for bread. Its richness in nourishing gluten is supplied by Western Canada hard Spring wheat. A strong flour that goes farther—economical.

PURITY FLOUR

Best for all your Baking

New Uniform Calendar Plan

Provides International Holiday And Five Business Holidays Yearly

With a suggestion that it be put into effect on January 1, 1933, Rev. Father Jacob Wilhelm of Regina, has drafted a reform calendar which provides for the days of the week always falling on the same dates of each month.

Under Father Wilhelm's plan the four quarters of the year are equal with 31 days for the first month of each quarter and 30 days each for the other two months except that 31 days are provided for December to give a total of 365 for the year. An extra day is wedged in between June 30 and July 1 every fourth year to be known as "leap day."

The year will start with January 1 labelled as "international holiday" and January 2 is to be a Sunday with December 31 a Saturday. If the calendar were adopted God Friday would always fall on April 7 and Easter Monday on April 9.

It is suggested that Saturdays falling on January 1, April 1, July 1 and October 1 be made business holidays, giving with international day on January 1, five business holidays each year. The first four, according to Rev. Father Wilhelm, would be known as rest days when everyone should carry out a review of his debts or profits.

The calendar is designed to offset objections of the Christian churches to the recently announced plan to provide for a year of 13 months containing 28 days each.

Patient Revived

Apparently Dead For Some Minutes Is Resuscitated On Operating Table

Another case of a patient who "died" on the operating table, only to be brought back to life again by heart massage and injections of adrenaline, is described in the current issue of the British Medical Journal.

The patient, Ernest Hinsley, about 45, of Watcric, Ashton, is now normal again, but has no memory of having been to the operating theatre.

His heart, said Dr. F. J. Fiddian, stopped without warning and Hinsley ceased to breathe. Efforts at resuscitation began immediately and the "usual" two or three minutes were wasted in fruitless artificial respiration.

Dr. Fiddian then resorted to cardiac massage, and continued this for two minutes without feeling any spontaneous movement of the heart.

He then injected "infra-cardiac" adrenaline into the ventricle of the heart. "The effect," he writes, "was immediate and almost magical. With each squeeze that followed the heart was felt to be enlarging and suddenly it began to beat wildly."

It was several minutes more before spontaneous respiration was established, but after that there was no further immediate anxiety.

"The patient was returned to bed with his heart still beating tumultuously, in a manner strongly suggestive of an overdose of adrenaline."

Was Not Photographed

Smallest Book Printed With Ink From Copper Plates

The world's smallest book, which is a quarter of an inch long, three-sixteenths wide, and weighs a grain and a quarter, is for sale in London. The most surprising thing about the text—which is E. P. Thompson's rendering of selected verses of the Rubaiyat—is that it is properly printed from minute copper plates, with ink, on paper, and not merely produced by photograph. The pages are stitched by hand and bound in leather. The verses look like small dark stains on the paper, and can be read only with a magnifying glass. When the book was being printed in Worcester, Massachusetts, in 1932 it was found that the vibration of a passing motor-car was enough to blur the type.

Distribution of Jews

A total world Jewish population of 16,240,000, of whom 5,000,000, or 30 per cent, live in the Americas was reported by the Jewish Scientific Institute. The survey shows the figure had increased 1,300,000 in the last 10 years. More than 10,000,000 Jews, or two-thirds, live in 33 countries. The United States has 4,450,000, Poland has 3,150,000 and Soviet Russia, 3,080,000.

Flyers usually find it necessary to use their oxygen apparatus when they reach an altitude of about 18,000 feet.

Argentina is estimated to contain 200,000 square miles of valuable forests. 2147

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of bile into your bowels daily. If this bile isn't flowing freely, your food doesn't digest. It just decays in the bowels. Gas builds up your stomach. You get constipated. Headaches come on in the head, and you feel weak, sick and the world looks pink.

A new liver movement called "LIVERWAKE" at the case. You need something that works on the liver as well. It takes these good old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harvesting and curing, they make the bile flow freely. They do the work of catalyst but have no oil or mercury in them. Ask for Carter's Little Liver Pills by name! It stubbornly refuses any other size, etc.

Overcomes Difficulties

Youth Born Deaf And Dumb Learns To Talk And Graduates From University

Born deaf and dumb 23 years ago, Hills Arnold, University of Minnesota graduate, has accomplished two objectives—speech and completion of a three-year mural painting project.

The youth's mother, Mrs. A. L. Arnold, said she taught Hills to read. She patiently enunciated words slowly. Hills repeated them by watching how she formed the syllables with her lips. Unable to hear, he was unable to control his tongue.

His mother with her hands, indicated when he was speaking too loudly or too softly. To-day he speaks in a clearly understandable moderate tone.

The youth entered the university engineering school in 1931. In his senior year he began an art project—a series of murals depicting the work of various engineering professions. To-day the job—100 feet of murals, five feet high—was completed and he was free to devote his time to another job, as instructor in the Minneapolis Institute of Art.

Building Flying Boats

Imperial Airways To Operate A World-Wide Service

More than 1,000 skilled men are engaged at Rochester, England, in building a fleet of 29 giant flying-boats for operation by Imperial Airways on world-wide services—including the Atlantic.

There are two decks to the new flying boats, lower being for passenger accommodation and the top for crew (two pilots, two stewards, and a purser), mails and baggage.

The gross weight of the new ships will be 17½ tons and they will be powered by four 740-h.p. engines, giving a maximum speed of nearly 200 m.p.h. and a cruising speed of 135 m.p.h. Underneath the pilots' cabin is a comfortable smoking room, and there are two more cabins more than eight feet high with adjustable lounge chairs.

There is daytime accommodation for 24 passengers and for 16 sleeping in bunks by night.

SELECTED RECIPES

CHERRY ROLL
Temperature: 425 degrees F.
Time: 25 minutes.
½ cup "Crown Brand" Corn Syrup
1 pint jar cherries (canned)
½ cup sugar
1 teaspoon cinnamon
1 cup boiling water
1 tablespoon butter
Tea biscuit batter
Drain cherries and pour juice in a saucepan. Add the water, sugar and "Crown Brand" Corn Syrup. Boil 5 minutes. While the syrup is boiling make an ordinary tea biscuit batter and roll it out in oblong roll. Spread the cherries over the dough; sprinkle with cinnamon, dot with butter and roll up like jelly roll. Place the roll in an oblong pan; pour the hot syrup over it and bake in a hot oven.

A limburger-cheese-sniffing contest was held in Monroe, Wis., in 1935.

Issuing New Coinage

Canada Could Improve On Design When Making Change

With the coronation of King Edward VIII, Canada, in common with the rest of the Empire, will issue a new coinage. Would not the present, while we still have a year or so, be a good opportunity for the Government to call together a body of artists and experts to submit designs for coins that would be a little more representative of Canadian artistic accomplishment than the exceedingly unattractive ones which, year after year, generation after generation, reign after reign, come from the mint with such deadly monotony?

Tradition declares that upon each accession upon the obverse side of the coin shall be reversed. When we have done that we in Canada are apparently content to allow the funeral wreath of maple leaves on the reverse side—which on a slightly worn coin much more closely resemble those of the cabbage—and the rather sprawling legend within it to continue to "symbolize" Canada. The comparatively new Canadian nickel is one of the ugliest coins in circulation anywhere.

Other countries are paying increasing attention to the attractiveness of their coins from an aesthetic point of view. Some of the newer United States specimens are things of real artistic beauty, indicative of the country's progress in the arts of sculptural design and modelling. There are surely competent artists in the Dominion who would welcome an invitation to compete for designs for coins of different values, and out of such competition there might come a coinage of which, from an artistic point of view, Canada could be legitimately proud. — Montreal Star.

London's First Film Show

Moving Pictures Taken Forty Years Ago Again Screened

London's first film show—40 years ago—came to life again recently at the Polytechnic Cinema to celebrate the 40th anniversary of the introduction of moving pictures to the country. The original projector used by M. Lumiere, the French pioneer, was used.

One gathered something of the thrill for an audience of that time of the spectacle of Trewey on the screen giving his changing hat performance and of Louis Lumiere's brother having tea on the lawn with his wife and baby.

When, subsequently, the pictures were thrown by up-to-date apparatus on to a large screen, one realized how good the photography was in the circumstances.

The changing of the guard at St. James' Palace, children playing in the park, the falling of a wall, a charge of the French Carabiniers, were some of the relics shown.

There was, too, a deliciously quaint "comic", indicating the popular suspicion of the motor car. Other interesting features, showing how the newsreel was advancing, were the animated records of the funerals of Queen Victoria and King Edward VII., taken by Cecil Hepworth.

He recalled his concern, at Queen Victoria's funeral, when he found that the noise of his home-made camera was disturbing the silence of that occasion and how King Edward, looking round, halted the procession so that the picture might be taken.

Professor (to unruly freshman)—"Tell me, what has become of your ethics?"

Freshman—"Oh, sir, I traded it in long ago for a Hudson."

Seedless watermelons have been grown in horticultural experiments.

Find Out

From Your Doctor if the "Pain" Remedy You Take Is Safe.

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

BEFORE you take any preparation you don't know all about, for the relief of headaches or the pains of rheumatism, neuritis or neuralgia, ask your doctor what he thinks about it—in comparison with "Aspirin."

We say this because, before the discovery of "Aspirin," most so-called "pain" remedies were advised against by physicians as being bad for the stomach; or, often, for the heart. And the discovery of "Aspirin" largely changed medical practice.

Countless thousands of people who have taken "Aspirin" year in and out without ill effect, have proved that the medical findings about its safety were correct.

Remember this: "Aspirin" is rated among the fastest methods yet discovered for the relief of headaches and all common pains, and is one for the average person to take regularly.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer, in the form of a cross on every tablet.

Demand and Get "ASPIRIN"

Three Dimensional Animated Cartoons To Be Shown

Three dimensional animated cartoons which can be shown with regular movie projection equipment and without use of any gadget by audiences were announced by Max Fleischer, pioneer in the animated cartoon field.

Fleischer declares his invention has passed the experimental stage, and that full length animated cartoons using the third dimension throughout will be released within six months.

Fleischer obtains the third dimensional effect by shortening the perspective of the camera to six feet and using a special lens which does not focus directly on the objects photographed.

Floods And Sun Spots

Are Closely Connected Is Opinion Of Planetarium Director

Floods that have swept the eastern part of North America during the past few weeks are "definitely correlated" with sun spots "and we may expect damp, rainy weather for the next four or five years because these spots are fast reaching a maximum intensity," Dr. Clyde Fisher, director of the Hayden planetarium and fellow of the Royal Astronomical Society, said in a lecture at Providence, Rhode Island.

Cockney woman (charged with assaulting her husband): "I asked 'im 'f he 'eved me, an' 'e was so long thinking 'bout it that I 't 'im with a mop."

RELIEF FROM ECZEMA

A Lady writes: I had Eczema break out on my leg and tried almost everything, but it did no good. Then I tried Mecca and got relief from the itching, and itching. I cannot speak too highly of Mecca.

League Is Unable To Take Measures To Save Ethiopia

Geneva.—A prevailing conviction that use of economic sanctions is futile and only force could halt the Italo-Ethiopian war was discernible on the eve of an extraordinary session of the council of the League of Nations. But no country seemed disposed to employ military measures against Italy.

A resolution deploring the war is expected to be adopted by the council and existing sanctions undoubtedly will continue, but almost everyone in Geneva feels that Ethiopia seems doomed and the league cannot save her. The league committee of 13 admitted that its efforts to bring peace had collapsed and called the session of the council.

Emperor Haile Selassie will pay the bill, observers were agreed. His independent state will, it was feared, meet the same fate as Morocco, Algiers and Tunis.

The warning of Prime Minister Stanley Baldwin that if the use of poison gas in Africa is followed in any future war in Europe anarchy will follow and civilization will perish, created a profound impression in international circles here.

A report of a committee of jurists appointed by the league said Italian forces sprayed some 13 Ethiopian towns with poison gas.

The Journal des Nations blamed individual Ethiopian warriors for committing atrocities upon wounded Italian soldiers but emphasized that what it called the resort to poison gas by Italian forces could only have been with authority of the government in Rome.

Ethiopia Needs Money

Is Planning To Float Loan In Great Britain

London.—A public loan to aid Ethiopia in its war against Italy, amounting to \$500,000 (\$2,500,000), will be floated here soon, it was reported here in financial circles.

Servicing of the obligation will be assumed by the Bank of Ethiopia, financial sources indicated. The loan will bear six per cent. interest. The bonds, nominally worth £100 (about \$200), will be issued at 95. They will mature in 1941.

Alberta's Fuel Oil Tax

New Act Passed By Legislature Is Effective May 1st

Edmonton.—The new fuel oil tax act passed at the last session of the legislature, under which the provincial government expects to raise \$200,000 additional revenue this year, is to be effective on May 1.

The tax is broadened to cover all grades of fuel oil. The tax is seven cents per gallon, with a rebate of six cents when the fuel is used for farming or industrial purposes.

Compulsory Subjects

Toronto.—English, social sciences, health education and business practice are to be compulsory subjects under the revised course of study to be introduced soon in Ontario schools. Hon. Duncan MacArthur, deputy minister of education, told the public school department of the Ontario Education Association here.

Intensive Survey Program Scheduled For This Summer

Ottawa.—The intensive surveys program of the Dominion department of mines, inaugurated last summer, will be continued this year, departmental officials said.

This will be welcomed by university students anxious for work during the summer holidays. Last year about 800 science under-graduates were given jobs in this work and it is expected almost as many will be needed this year.

The surveys will start earlier this season. The money was not available last year until late in June and the parties were not in the field until July.

The vote last year was \$1,000,000 and all but \$150,000 spent. This balance is available for this year with a vote of \$350,000 in the main estimates, bringing the total up to

Plans For Ethiopia

Italy's Policy Will Be For Complete Domination

Rome.—Italian plans for governing "conquered Ethiopia" are already on paper and are being studied by the ministry of colonies, informed sources said here.

An outline of these drafts was said to be:

1. As soon as Addis Ababa is reached Italian domination over Ethiopia will be formally established.

2. The Ethiopian dynasty under Emperor Haile Selassie will be dispossessed.

3. The Italian military command will organize the country by (a) dividing the conquered territory according to racial characteristics; (b) setting up various chieftains and members of the nobility as civil leaders in the different zones; (c) proclaiming civil and religious liberty throughout Ethiopia; (d) organizing a mercenary native army under Italian officers; (e) organizing colonial police under Italian carabinieri.

4. During the preliminary organizing stages the Italian policy will be to assure an Italian economic and commercial monopoly in Ethiopia, but when the country is organized the open-door policy will be maintained.

5. During the entire course of organizing the new country, British and French rights, stipulated in the treaty of 1906 with Italy, will be recognized and will not be molested.

British Columbia Not Interested In Creating Provincial Bank

Victoria.—Premier Pattullo of British Columbia arrived home for a brief visit before returning to Ottawa for continuation of negotiations with the Dominion government which were interrupted by the Easter holidays.

The premier, who arrived by aeroplane, said discussions between British Columbia and the federal administration do not concern the receipt of Dominion aid in connection with a \$3,500,000 bond issue maturing May 15, but rather settlement of general policies. These policies, he said, include relief, financing and other matters.

"British Columbia has no thought whatever of creating a provincial bank, and has not for a minute considered it," he said in reference to a recent announcement the government of Alberta would suggest co-operation of the coast province with Alberta in establishing such a bank.

Newspaper Man Dead

London.—The death is announced in Glasgow, at the age of 74, of John Westwood Oliver. Fifty years ago he was one of the first newspapermen to travel across Canada on the newly-built Canadian Pacific Railway.

He wrote a number of special descriptive articles for Scottish newspapers.

Tenders Accepted

Ottawa.—Finance Minister Dunning announced tenders had been accepted for the full amount of \$25,000,000 Dominion of Canada treasury bills due July 15. The average discount price of the accepted bids was 99.78138 and the average yield was .879 per cent.

Apostolic Appointment

Vatican City.—Mgr. Turqueti, apostolic vicar of Hudson Bay, was named superior of the St. Mary Immaculate missionaries working in his vicariate.

Canada's Resources

Development Of Our Natural Resources Will Set New Pace

Montreal.—Development of Canada's natural resources during the next 25 years, if there is peace, will grow more than it has during the past 75, Dr. H. M. Tory, of Ottawa, former president of the University of Alberta and honorary director of the Association of Canadian Clubs, said at the annual meeting of the Women's Canadian Club here.

There was every justification for an optimistic attitude in Canada he said. The right combination of land and climate had created conditions to make a civilization.

Canada was a large country, communications were easy, centres of population were close at hand, he continued. The people, the two greatest civilizing and colonizing races in the world combined into one nation, were gentle, intelligent and progressive.

The past generations had made a magnificent job of Canada, Dr. Tory said. Mistakes had been made, he admitted. Canada was even now paying the price for stupidity in early transportation development, but he said, there never would have been a Canada had it not been for the railways.

Dr. Tory praised the tendency to study national problems. Unity must be maintained, he said, and provincial barriers should be broken down even more than they now are. Canada must take leadership in intellectual movements, he concluded, for an educated people was the foundation of civilization.

Will Not Consider Plan

British Columbia Not Interested In Creating Provincial Bank

Victoria.—Premier Pattullo of British Columbia arrived home for a brief visit before returning to Ottawa for continuation of negotiations with the Dominion government which were interrupted by the Easter holidays.

The premier, who arrived by aeroplane, said discussions between British Columbia and the federal administration do not concern the receipt of Dominion aid in connection with a \$3,500,000 bond issue maturing May 15, but rather settlement of general policies. These policies, he said, include relief, financing and other matters.

"British Columbia has no thought whatever of creating a provincial bank, and has not for a minute considered it," he said in reference to a recent announcement the government of Alberta would suggest co-operation of the coast province with Alberta in establishing such a bank.

Newspaper Man Dead

London.—The death is announced in Glasgow, at the age of 74, of John Westwood Oliver. Fifty years ago he was one of the first newspapermen to travel across Canada on the newly-built Canadian Pacific Railway.

He wrote a number of special descriptive articles for Scottish newspapers.

Tenders Accepted

Ottawa.—Finance Minister Dunning announced tenders had been accepted for the full amount of \$25,000,000 Dominion of Canada treasury bills due July 15. The average discount price of the accepted bids was 99.78138 and the average yield was .879 per cent.

PARALYZED PILOT

Although she has never walked since an attack of infantile paralysis at the age of three, Miss Betty Snell, of St. Thomas, Ont., recently won her private pilot's license. Miss Snell, who has to be carried to her plane and lifted into the cockpit, seeks to become a commercial pilot.

New Hospital For Aklavik

Plans Completed But Money Is Not Yet Available

Toronto.—Plans have been completed for erection of a new hospital at Aklavik, Arctic trading post in the Northwest Territories, but Mr. Rev. A. L. Fleming, Anglican bishop of the Arctic said he didn't know where the money was coming from. About \$25,000 is needed for the structure to replace the hospital destroyed by fire April 6.

Contributions are coming in slowly, but it is feared the necessary amount would not be obtained in time for purchasing supplies for work this year. Bishop Fleming said. As the hospital is situated 1,661 miles north of the railway, orders for materials must be placed within three weeks if the hospital is to be rebuilt this year.

Named For Peace Prize

Forty Different Countries Have Suggested Duggan Lady Aberdeen

London.—The Dowager Lady Aberdeen, wife of the former governor-general of Canada, whose name has been put forward as a candidate for the Nobel prize in her capacity as president of the International Council of Women, received the support of women's organizations in all parts of the world from the beginning.

Her name was submitted from 40 different countries where the National Council of Women affiliated to the International Council have, under her guidance, worked steadily in the cause of peace for several years.

War-Type Ships Moved

Britain Sends Anti-Submarine Craft To Gibraltar

London.—With tension and uncertainty mounting in Geneva, the admiralty has moved a new, secret type of anti-submarine craft to Gibraltar to bulwark the warships scattered through the Mediterranean.

Publication of the admiralty list showed 15 especially-designed ships capable of mine-sweeping travels had arrived at Gibraltar from home ports within the last week. Most of them left the Portland base on Easter Sunday.

Five destroyers meanwhile arrived at Gibraltar from the eastern Mediterranean.

Turkey Violates Treaty By Fortifying Dardanelles Strait

Advocates Mining Policy

Would Cure Canada's Unemployment Opinion Of Supreme Court Judge

Vancouver.—Mining directly and indirectly could take every able-bodied man presently unemployed out of unemployment, Mr. Justice A. M. Manson of the Supreme Court of British Columbia said in an address to the annual meeting of the British Columbia division of the Canadian Manufacturers' Association.

He advocated a Canadian national mining policy and a conjoint policy between the Dominion and the mining provinces. "The policy that will give to those who hazard their money in the development of our natural wealth, and so often lose it, a chance to get their capital back—no taxes for the first years of production."

"Such a policy," continued Mr. Justice Manson, "should stabilize mining taxation for a period of years. It must do that if we are to induce capital from abroad to come to Canada. Mining capital will not venture on a big expenditure knowing that at the very moment it brings a mine to production its margin of profit may be eaten up by increased taxes, Dominion and provincial. Such a policy should fix the rate of taxation so that it will be possible to recover the maximum of low grade ore."

Conferences Failed

Japs Refuse To Aid Chinese To Halt Smuggling

Nanking, China.—Chinese officials said three days of conferences had failed to bring Japanese co-operation in an effort to halt large-scale smuggling into North China which is depriving the national government of millions in sorely-needed revenue.

Simultaneously, authorities said, the legitimate import trade in North China is being ruined.

Officials of the finance ministry conferred with the railway and foreign ministries for three days but failed to produce an effective scheme. The Chinese said diplomatic protests to Tokyo about the smuggling, alleged to be carried on by Japanese and Koreans, were ignored there.

Caused Much Discussion

Members At Geneva Are Divided Over Regional Leagues

Geneva.—A move by some of the Latin-American countries to create an all-American League of Nations caused much discussion and sharply divided reaction here.

Some league circles feared this would be the beginning of disintegration of the Geneva institution. Others, however, believed these regional leagues could constructively dovetail into a universal League of Nations.

League officials said they were convinced economic and financial sanctions must be applied universally against any aggressor nation, but they believed these regional groups could liquidate regional conflicts and apply military sanctions in case of necessity.

War-Type Ships Moved

Britain Sends Anti-Submarine Craft To Gibraltar

London.—With tension and uncertainty mounting in Geneva, the admiralty has moved a new, secret type of anti-submarine craft to Gibraltar to bulwark the warships scattered through the Mediterranean.

Publication of the admiralty list showed 15 especially-designed ships capable of mine-sweeping travels had arrived at Gibraltar from home ports within the last week. Most of them left the Portland base on Easter Sunday.

Five destroyers meanwhile arrived at Gibraltar from the eastern Mediterranean.

Constitutional Reform Measures May Go Over Until Next Year

Ottawa.—Constitutional reform, which seemed almost a certain issue at the opening of parliament in February, will probably go over until next year, according to the best information available here.

Some weeks ago it was apparent that the efforts engaging the attention of Dominion and provinces to obtain power for house and senate.

It is now considered unlikely that any amendments will be asked during the present session. A resolution is on the order paper containing a petition to Westminster to amend the British North America Act so Dominion-provincial financing might be set up, but recent developments have caused at least temporary suspension of these plans.

At the Dominion-provincial conference in December, soon after the present government took office, it was agreed that certain specific amendments to the constitution were needed urgently. With New Brunswick dissenting, it was agreed further that Canada should obtain the right enjoyed by other dominions of amending her own constitution.

Plans were launched by which agreement might be reached on a re-enactment of the British North America Act, or a specific amendment put through, so that Canada might enjoy constitutional autonomy. A sub-committee of experts has been working to that end for many months.

Since all provincial legislatures soon will have concluded their sessions for this year the possibility of carrying out this plan during 1936 has ended. It will almost certainly be a major feature of the 1937 sessions of federal and provincial houses.

Istanbul, Turkey.—Turkey added her name to the list of nations violating post-war treaties, sending troops to strategic position in the demilitarized zone around the Dardanelles Strait.

Troops moved into the demilitarized zone, following a decision reached at a meeting of the Turkish cabinet, at which President Kemal Atatürk presided. Marshal Fevzi Pasha, chief of the army general staff, also attended the cabinet session.

The orders to enter the Dardanelles area were delivered secretly, and the army went in without any public announcement.

Under the Lausanne treaty relating to the Dardanelles, signed July 24, 1934, a zone on both sides of the Straits was closed to Turkish military forces.

Great Britain, France, Italy and Japan guaranteed security of the area and freedom of navigation through the Straits. Turkey granted them a restricted right of passage for their war vessels.

Turkey's request for permission to rearm the demilitarized zone had not been answered by the powers, although it had been given a generally favorable reception, contrasting, as it did, with the recent unilateral violation of treaties by Germany in sending troops into the demilitarized Rhineland.

Austria's recent order for general military conscription was considered by the Little Entente nations another violation of a post-war treaty, that of St. Germain, and they protested against the action.

In Geneva, London and Paris, Kemal Atatürk's action was regarded as unfortunate, coming at a time when Turkey was being praised for first asking for revision of the Lausanne treaty. But the government decided to act before replies to the Turkish note were received.

The move created excitement in Bulgaria, now the only member of the former central powers that has not violated the post-war treaties. Concern for the security of Bulgaria's southern frontier was expressed.

Caused Much Discussion

RAILWAY TRIPS FOR FATHERS' AND MOTHERS' DAYS

Montreal. — Opportunities for out-of-town sons and daughters to entertain their mothers on Mothers' Day, Sunday, May 10, or fathers on Fathers' Day, a little later, are being given this year by the Canadian Pacific Railway, according to announcement today by G. E. Carter, general passenger agent of the company. For these two important days in the lives of all parents, the Canadian Pacific year.

Railway is featuring a delivery service of railway tickets, whereby a son or daughter can pay for the transportation at the nearest Canadian Pacific office in the municipality where he resides, and the order will be sent by telegram to the parent's home-town office and delivered directly to the home without extra charge. This service proved very popular last Christmas and New Year's and is expected to provide a happy holiday for parents with out-of-town children on Mothers' and Fathers' Day this year.

Local News

Born—To Mr. and Mrs. James Smith, Thursday, April 16, a son.

Mr. and Mrs. Neil Fleming were visitors at Lethbridge over the week-end.

Mr. and Mrs. Sidney Short were visiting friends at Lethbridge over the week-end.

Mr. and Mrs. M. Joyce and Mr. and Mrs. Jack Richards motored to Lethbridge on Saturday.

Mrs. C. D. Rogers left Friday afternoon for Calgary, returning home on Sunday morning.

Sam Moores has purchased a new Terraplane car from Sentinel Motors.

Miss Bridget Burn recently took over the operation of Graham's Beauty Parlor.

John Balloch and son Alex were Lethbridge visitors during the week-end.

Miss Lois Thomas left for Vancouver on Sunday evening, after being home several months on completion of training as a nurse.

Mr. and Mrs. Robert Graham were visitors at Lethbridge over the week-end, the guests of the latter's sister.

John A. McLeod, of Cadomin, Alta., former superintendent of International Co. mine, was a visitor here on Monday. He had been on a trip through to Trail, B.C.

Rev. and Mrs. A. E. Larke, of Blairmore and Harold Reid motored to Lethbridge on Sunday, where Mr. Larke conducted morning service at Southminster church.

Wm. Pryde received painful bruises at his employment at McGillivray mine on Friday evening, when rock and coal fell on him, making it necessary to transport him to the Miners' hospital.

Mr. and Mrs. Frank Jackniski, formerly of Drumheller, were the guests of Mr. and Mrs. Davidson last week, on their way to Vancouver, where they expect to reside. Mr. Jackniski was formerly with Distributors Ltd. at Drumheller.

At a meeting of the Canadian Legion on Friday D. Waddington, T. Blower and Alex. Kotch were appointed sick committee for the ensuing three months. The Ladies Auxiliary have made a fine Union Jack which was in use for the first time at their meeting on Friday. A social was held following the regular business meeting.

Natal-Michel branch of the Canadian Legion is opening a new library for the loan of books. The branch has taken a prominent part in community life, and this new departure will be appreciated. The executive officers are G. Stevenson, president; W. Holmes, first vice president, and Robert Mitchell, secretary-treasurer.

There returned this week from a short visit in Vancouver, Miss F. Milley, and Mr. Ian Neave, and they were accompanied on their return by Mr. John Milley, a citizen of the world, who since his last visit home has visited various places on the Pacific coast and has travelled as far north as Alaska. While in Vancouver, they met John Pratt, formerly of Coleman, who expressed his intention of leaving shortly for Australia.

J. Davis, who lived on Sixth street and left here in 1923, is at present visiting here. His wife died about a month ago at Nanaimo, V.I., where the family had been living for some time. A family of five survive, two of whom are married, and the youngest child is 14 years old. For many years Mr. Davis worked for International Co. Sympathy of many old friends is extended to him in his bereavement.

BAND ENTERTAINS TOWNS-PEOPLE

The town band, under Fred Beddington, gave two open-air concerts last week, enlivening the town with their stirring music. Classes for beginners will be organized, and it is expected that Coleman will have a band second to none in the towns of southern Alberta.

GERTIE TAKES A RIDE

A former pupil of Coleman high school breaks into the news by leaving on her holidays by airplane. The roads were so muddy she could not travel by car, so she took to the air. Here is the news despatch recorded in the Lethbridge Herald:

SUNDIAL, April 17.—Bad roads hold no fear for Sundial's popular young school teacher, Miss Gertie May, when she wants to take a holiday. An airplane swooped down at 3.30 p.m. Thursday from out of the clouds and after anchoring to a fence post till the lady was ready to embark, flew away, much to the delight of the entire school, who stayed to see them take off.

The "Ham News," published by the Spokane Radio Co., contained a reproduction of an interesting photograph taken by Harold Reid, himself an amateur operator. It showed his 18-months-old niece, Margery Ann, sitting at his transmitter set, with the clock showing 3 a.m., and the receiving head-piece clamped on, listening for the answers to her messages.

ALTMATT ORCHESTRA BUSY

Altmatt orchestra had a very busy Easter week, playing at Columbus Hall, Blairmore, April 13 and 15, Hillcrest April 17, Coleman April 18, and will be playing at Bellevue April 24, Coleman April 25. Orchestra members are: Foss Boulton, sax; Jerry Seaman, drums; Geo. Kerr, violin; Altmatt, piano and pianocordeon; Helen Seaman and Nellie Royal, assistant pianists. All pupils of Altmatt.

Mrs. M. W. Ferguson was made a presentation by the Pythian Sisters on Wednesday evening. Mrs. Ferguson will be leaving shortly for Nova Scotia, where she will make an extended visit.

Capt. Beebe's host of friends are greatly concerned over his serious illness. He is under the care of Dr. Rose at Hillcrest.

Word from McKean Hunter states he is out of hospital, but still taking treatment in Calgary.

"My TERRAPLANE does more than most cars claim"

"It's tops of all the cars I've ever owned."

IN our showroom, "owner talk" means more than "sales talk." We're content to let claims take a back seat until you've given us a fair trial.

On performance, you needn't take the word of anyone but the man who knows how much easier his Terraplane handles in traffic... how much better it takes straight-aways or curves... how much faster it is on the get-away. His economy figures talk louder than any salesman's claims... even ours! He can tell you facts about Terraplane's long life that would sound boastful if we said them.

But even a Terraplane owner can't put into words just what it means to sit at the wheel of this car and drive! With the Electric Hand shifting the gears, your hands stay always on the wheel. Just a flick of the finger... and gears shift! And your front floor is all clear... Terraplane is the only low priced car with real comfort for three in the front seat... no gear or brake levers to fumble over!

Steering is truer. There's an amazing riding smoothness. At the brake pedal, safer stopping than you'll find in any other car, with two braking systems at your command... and still a third from the easiest handling parking brake you ever saw. You ride over the world's first safety engineered chassis... in a body really all of steel, with solid roof of seamless steel. On every side, something new to discover and enjoy. Stop in now and take this "Discovery Drive"... see for yourself what a change Terraplane has made in motoring.

A. M. MORRISON, Terraplane Dealer

IN THE LOW PRICE FIELD TERRAPLANE IS
